Excel databases listing individual course entry requirements and tuition fees

Circa 24,000 UG & 18,000 PGT courses at 200 UK institutions

Standard and Non-Standard fees columns to enable easier numerical analysis

PG filters to identify study mode, length of study, enrolment date and teaching model

A valuable resource to support new course development research

Options to add data for previous years and university & subject metrics

"The datasets have made a huge impact on our university fee setting decisions. TKP has kept us well-informed on the fees collection progress, helping us plan our analysis and report the findings in a timely manner."

Business Insight Manager, University in South West England

Undergraduate
A database of undergraduate courses, including degrees, higher technical qualifications and more. Options to view data on international tuition fees, entry requirements, or both!

Postgraduate Taught
A database of all Postgraduate Taught courses offered, with listings of:
- UK and International tuition fees
- Alumni discounts
- UK academic entry requirements and English language (IELTS) requirements
- Course structure – delivery method (e.g. online, campus-based), study mode, length and start date period (e.g. Autumn, Winter, Multiple)

An important tool for the tuition fee setting process

Undergraduate
Postgraduate Taught

Benchmark your fees & entry requirements against other providers
Examine alumni discounts for PGT entrants
Explore competitor approaches to EU fees post Brexit
Identify courses with different enrolment dates for the upcoming cycle
Discover newly emerging course areas and assess the level of competition
Easily access further information through individ. course page URLs
Easily filter subject or institutional groups
Compare the length of study of full-time PGT courses
